'Fresh from the gardens'

Canadian Anomalies

Following the close of the Great War by the signing of the Armistice, Canada demanded and was accorded a place of equality with other nations of the world at the Peace Conference, and, with the creation of the League of Nations, Canada entered that League on exactly the same terms as all other nations. That is to say, Canada was recognized as a nation. And in signing the League Covenant, Canada accepted the responsibilities of a nation.

At the last Imperial Conference, in London, with all the self-governing Dominions of the Empire and the British Government fully represented, a formal declaration was adopted setting forth that Canada and the other self-governing Dominions were fully autonomous nations within the British Commonwealth of Nations, possessing exact equality with Great Britain.

As a logical outcome of these declarations, Canada has established her own legations in certain foreign countries, appointed her own ministers, and, in turn, these countries have named ministers at Ottawa. Thus, as a nation, Canada has direct representation at Washington, Paris and Tokio. In exactly the same manner as any other country. Equally significant is the fact that the British Government has appointed a High Commissioner to Canada, while Canada maintains a High Commissioner in London.

But while Canada is thus recognized as a nation, it is the only nation in the world which has no nationality of its own, and no distinctive flag of its own. These are anomalies which other people find it extremely difficult to understand.

In England, people born in that country are recognized and officially listed as English; if born in Scotland, they are listed as Scottish; in Ireland, as Irish; in France, as French; in Germany, as German; in the United States, as American. Born in Canada, on the other hand, a person may be listed as of any nationality under the sun except Canadian. Officially, there is no such person as a Canadian.

The writer of this article was born in Canada as were his father and mother. His mother's parents were both born in Canada. His father's parents were born in Ireland, their ancestors having crossed to the Emerald Isle from Scotland. So the writer becomes, in Canada, an Irishman although neither he nor his parents ever saw Ireland. If his grandfather had been born in Siam, then the writer would be a Siamese.

In the face of such an anomaly, such a ghostly absurdity, it is little wonder that the people of other countries laugh in the face of any person born in Canada who is bold enough to lay claim to his country being a nation.

Every nation in the world, except one, has a distinctive flag of its own. The exception is Canada. Australia, New Zealand, South Africa, Newfoundland, the Irish Free State all have their distinctive national flags, as well as the Union Jack, the flag of all of Great Britain and the Empire. Canada has a distinctive flag for its merchant marine, and by Orders-in-Council it has been decreed that this shipping flag shall be flown over Canadian Government buildings in the British Isles, and in foreign lands, but it is not officially recognized anywhere else.

Thus, while a Canadian may fly a distinctive Canadian flag over a ship owned by him, he may not fly it over his office building or his residence, and while such a flag may be flown over a Canadian Government building in London, Washington, Paris, or Tokio, it cannot be flown over a Canadian Government building in Halifax or Vancouver, or anywhere between these two points.

A person born in Canada is, therefore, that peculiar individual among the peoples of the world who has no nationality he can call his own, and no distinctive flag that he can properly fly in his own land and over his own home and public institutions.

And yet the people of Canada find pride in calling Canada a nation. Why, this so-called nation of Canada has not even the right to amend its own constitution, a power possessed by other self-governing dominions of the British Commonwealth.

Canada is, and is proud to be, and desires to remain, a part of the British Commonwealth of Nations. It is proud of and loyal to the Union Jack as the flag of that great Commonwealth, and will ever retain it. But just as the Dominion has its own Coat of Arms, and each Province its Arms, and each city its Arms, so do the people of Canada desire to establish and retain their own nationality, have their own distinctive flag, and enjoy full autonomy in their domestic affairs.

Much as a native born Canadian may love England, or Scotland, or Australia, or New Zealand, he does not desire to merge his identity or lose his individuality. He is a Canadian and desires to be known as such, not as an Englishman, a Scotsman, an Australian or a New Zealander.

If Canada is a nation, let it display the qualities and the insignia of a nation.

Student Aviator Gets Thrill

Fell Out Of Plane But Fortunately Had Parachute

Arthur Center, automobile dealer and student aviator, of Springfield, Mass., experienced an unexpected thrill when he fell out of his plane while flying 1,800 feet over Springfield airport.

Center, who was flying without a safety belt, but who had a parachute, pulled the cord of his parachute and made a landing unhurt. The plane fell in an open field and was demolished.

School Teacher: "If a farmer has 14,000 pecks of potatoes, and he sells them for 20 cents a peck, what will he get?"

Small Boy: "A set of golf clubs, a radio and a town car."

Rheumatism

Massage the aching parts with Minard's. Soothing relief assured.

Reconstructing a Liner

Timber From Many Countries Used On Palatial Steamer

Timber of many forests in many countries has been used for reconstruction and redecoration during the seven weeks' overhaul of the White Star liner "Majestic," which recently left Southampton for New York, on her one hundredth west-bound crossing. The varieties of wood included oak, mahogany, teak, beech, ash, satinwood, walnut, Oregon yellow and pitch pine, deal. Forty-four tons of paint was used on interior and exterior work, whilst 18,000 yards of electric wire was used in wiring electric bells and electric lights in cabins of tourist third cabin accommodation.

Women Are Excluded

By the iron rule of a woman, no woman has ever entered the gigantic Krupp plant except the former Kaiserin. The regulation was laid down by Frau Margarethe Krupp, for years chief director, and continued in force by her daughter, the present owner, Frau Bertha Krupp Von Bodeln and Halbach.

Five hundred years before the birth of Christ, Hippocrates, a Greek, wrote a book on medical science which is still studied by students in America and Europe.

All Weather Road Promised

From International Boundary To Prince Albert National Park

An all-weather highway from Regina to the boundary to Prince Albert National Park will probably be put into condition, F. R. MacMillan, of Saskatoon, president of the Saskatchewan Conservative Association, told members of the Kiwanis Club at Prince Albert. He thought that this should be the policy of the government, and the fact that a cabinet minister in the Anderson Government, Hon. J. A. Merkle, was on a trip to the park was an evidence of the government's interest.

HEALTH REGAINED

Mother and Daughters Restored Through the Use of Dr. Williams' Pink Pills

"Contrary to what my friends once thought, I am still living," says Mrs. Norman White, New Canada, N.S., "and I give the credit to Dr. Williams' Pink Pills. I had been a sufferer for some years. I was weak and run-down; my heart would palpitate violently at the least exertion. I grew so weak that I could not do my housework. I was under a doctor's care, but it did not benefit me. A second doctor was called in, but with no better results. I was told that I was almost bloodless, and I became so weak I was forced to remain in bed. My friends did not believe I could recover. While in this condition a neighbor strongly urged me to try Dr. Williams' Pink Pills. It was like grasping at a straw, but six boxes of this medicine were got for me, and by the time I had taken them I was able to get up. Another six boxes were got and soon I was able to go about my health steadily improving. I continued the use of the pills until I felt my health fully restored. I still take the pills occasionally as a safeguard. My two daughters have also used the pills with the most beneficial results. The trouble in both cases was the anemia that so often comes when girls are entering womanhood. Under the use of this medicine both fully regained health, strength and activity. You can see, therefore, that it is impossible for me to praise Dr. Williams' Pink Pills too highly, and I hope every weak person who may read this will benefit by my experience."

You can get these pills from any medicine dealer by mail, at 25 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Escape From Submarine

Men Leave Submerged Craft In Record Time During Experiment

Ten men emerged from the sunken submarine T-17 in forty-eight seconds during a submarine experiment in Italy, making what is called a world record for such a feat. Half of the participants used life pieces, while the others were not especially equipped. "The submarine carried a new device consisting of a large bowl beneath a torpedo tube permitting the men to leave the submarine without water entering the hull."

A Household Medicine.—They that are acquainted with the sterling properties of Dr. Thomas' Electric Oil in the treatment of any ailment would not be without it in the house. It is truly a household medicine and as it is effective in dealing with many ordinary complaints it is an inexpensive medicine. So, keep it at hand, as the call for it may come most unexpectedly.

What's In a Name?

An Englishman's home is his castle, but whether he is able to call his castle what he likes is a matter of some doubt. The thought arises because the Bank of England officers have decreed that the words "Bank of England" on a building in London must be removed. The words, carved in bold letters in stone, have adorned this building for over a hundred years. Why they are there on one knows.

Her Little Boy Was Very Ill With Summer Complaint

Mrs. Ray Fisher, Lebert, Sask., writes: "For over a month, last summer, my little boy was suffering from summer complaint. He got so bad there began to be traces of blood in his stool, and anything he ate would not stay on his stomach very long. He became so weak he could not stand up. A neighbor recommended

"DeFowler's Ext.-of-Wild-Strawberry" and in despair I sent for a bottle, not expecting any more benefit than from the many other medicines I had used, but to my surprise I noticed a change after he had taken a few doses, and before the bottle was half used he was the same happy, healthy boy he was before he took sick."

Wheat Grading High

Quality Year In Wheat Production In Saskatchewan

This year is a quality year in wheat production in Saskatchewan. Seventeen cars of No. 1 hard wheat have already been received by the flour mills at Saskatoon. In each of the years, 1927 and 1928, there was just one car of No. 1 hard wheat produced in western Canada.

The wheat graded by the Dominion grain inspector at Saskatoon up to the present time shows a very high proportion of the high grades, as follows:

No. 1 hard, 6 per cent.; No. 1 northern, 53 per cent.; No. 2, 39 per cent.; No. 3, 4 per cent.

A part of the No. 2 is Garnet wheat to which the No. 1 grade is not given.

At the Moose Jaw inspection point 50 per cent. of the wheat is No. 1, 35 per cent. No. 2, and the balance mostly No. 3. A. McPherson, of the Dominion seed branch, reports.

This year northern Saskatchewan is producing wheat of equal quality to that grown in the southern part of the province. This is held to be unusual as excess moisture during the growing season in most years makes the northern wheat starchy. The Elrose line is producing a high percentage of No. 1 hard, Hughton and Elrose being outstanding shipping points.

Interested In Peace Garden

Financial Support Promised By Industrial Concerns In U.S. and Canada

Interest is developing in a proposal of horticulturists of Canada and the United States that an International Peace Garden be established at some point along the boundary between the two countries. The idea has brought expressions of approval from the Governor-General of Canada and Hon. William Phillips, the United States ambassador to the Dominion, as well as from several Canadian politicians of cabinet rank. The heads of many large industrial concerns on both sides of the boundary have promised financial support, and a considerable sum is in view, as a nucleus of endowment for the garden.

Certain it is that a garden of the sort proposed would be a beautiful and fragrant memorial to the well more than a century of peace between Canada and her neighbor, and also an impressive pledge of goodwill. Its spiritual value at all times would depend upon the degree to which it was a symbol of cordial feelings actually entertained by the peoples of the two countries towards one another and as carried into practice by them. — Regina Daily Post.

Roumanian Scientist Designs "Space Rocket"

Hopes To Carry Mail To America In Thirty Minutes

A "space rocket," designed to shoot upward for 32 miles, and it is hoped, be the forerunner of a rocket that will carry mail to America in 30 minutes, is to be built at once, it has been learned.

Prof. Hermann Oberth, a Roumanian scientist, designed the rocket. It will be built under the supervision of the U.F.A. Film Company. Its object, for the first flight, is to measure the physical and chemical properties of the atmosphere. Instruments will be enclosed in it to this end.

Holloway's Corn Remover takes the corn out by the roots. Try it and prove it.

Winnipeg Heads List

Aviation Club Has Record Of Over Thousand Hours In Air

The rapid growth of air-mindedness in Canada is indicated by the fact that members of clubs in Canada have flown more than 10,000 hours, during the first eight and a half months of the year.

The Winnipeg club heads the list with well over 1,000 hours in the air. Toronto comes second with about 1,000 hours, and Ottawa third with just over 900 hours.

One hundred and ninety-two new private, and 57 commercial pilots have graduated from the ranks of the students in the clubs. In 1923 the figures at the end of the year showed 11 private pilots and 28 commercial.

This year there are 22 clubs in actual operation as against 15 last year.

Old Dobbin had one good point. Nobody brought out a new model about the time you got him paid for.

Artificial Silk From Acetic Acid

Combined With Cellulose Will Make Fine Fabric Is Predicted

Prediction that the sour taste in vinegar will be used to make artificial silk was made to the United States Chemical Society today by Professor D. B. Keyes, of the University of Illinois. The sour substance, which chemistry's magnetic touch may make finer dresses was called by Prof. Keyes by its scientific name, acetic acid. He told of a newly-developed process at Illinois for making it, developed in co-operation with E. P. King and Sherlock Swanne, of the university. For making artificial silk it is combined with cellulose to form cellulose acetate.

Externally Or Internally, It Is Good.—When applied externally by brisk rubbing, Dr. Thomas' Electric Oil opens the pores and penetrates the tissue, touching the seat of the trouble and immediately affording relief. Administered internally it will still the irritation in the throat which induces coughing, and will relieve affections of the bronchial tubes and respiratory organs. Try it and be convinced.

Makes Ninety Miles An Hour.

Moth 'Plane Purchased By Prince Is "Pure British"

The Prince of Wales made his first flight as owner of an airplane, to see his father at Sandringham. It is a G. H. Gypsy Moth, price only \$3,300. The Prince would not buy anything not "pure British." The little Moth makes 90 miles an hour, is painted bright red and blue and carries a silver plate marked "H.R.H. The Prince of Wales." The little machine with aluminum nose is upholstered in scarlet leather which can be inflated to avoid bumps.

World's Grain Show

National Committee Will Meet In Toronto In November

Hon. W. R. Motherwell, Minister of Agriculture, is calling a second meeting of the national committee of the world's grain conference and exhibition. The meeting will be held in Toronto on November 21.

Considerable work has been accomplished in preparing for the world conference which will be held in Regina in 1932. The tentative prize lists will soon be ready and will be so arranged that every province will have good chances in some of the classes. As soon as the lists are completed copies of them will be sent to all foreign countries with invitations to compete.

Would Broadcast Trials

The broadcasting of trials in Berlin courtrooms was being contemplated, says a report from the German capital. It was declared there were no legal objections to such procedure, since all trials are public, and that if inaugurated it would be a novelty which soon would be copied throughout the world.

Mysteries Are Wrapped Up In Strange Disappearances Of Many Deep Sea Vessels

Denmark has abandoned as hopeless its long search for a clue to the fate of the full-rigged clipper training ship "Copenhagen" with sixty cadets aboard; seen for the last time in the throes of her struggle with a heavy sea off a lonely island in the South Atlantic. During the seven months of weary exploration that has intervened, not so much as a spar, a lifeboat or a piece of flotsam, wreckage has rewarded the Danish seamen who undertook the quest for the missing ship. The mystery that envelops the Copenhagen closely resembles that attending the disappearance of the United States collier "Cyclops," and it has prompted the New York Sun to recall other tragedies of the sea that also remain unsolved.

In the latter part of 1923 an American steamer came upon the schooner "Mary Cornish" in mid-Pacific. Nothing indicated that the schooner had suffered from disastrous weather or that it had been swept by a high sea. Bloodstains were found on a newspaper in the cabin, but no evidence of a struggle; there was neither officer nor crew aboard, and no boats were missing. What had occurred aboard the craft will, in all probability, never be known. Two years before this the captain of the French sailing ship "Emile Gallien," in rounding Cape Horn, found a three-masted vessel embedded in an iceberg. The craft was firmly fixed in a cleft of the ice mass about twelve feet above the water's edge and, with the exception of a broken topmast, appeared intact. There was no sign of life aboard, and all the boats were in place. He reported the circumstance and the ship was tentatively identified as one long reported missing, but no one was able to offer an explanation of its loss.

A French steamer fell upon a large junk in the China Sea, which, upon investigation, the master found was deserted. In the junk he saw upon a cargo of silk and a considerable sum of money. The only explanation was offered by a Chinese member of the crew; who said that it was a craft belonging to a band of pirates who had fled the vessel in fear that the steamer was a disguised warship. As strange a discovery was reported by the captain of a Dutch liner plying among the West Indies and along the South American coast. He boarded a tramp steamer destitute of life except a starving dog. He found evidence that the crew had only shortly before abandoned the vessel. His theory was that when the ship had become becalmed they had taken to small boats in the hope of towing the vessel, but had been swept away by a strong current. The steamer had been listed among missing ships, but in this case, too, only conjecture was left regarding the fate of its crew.

Not always does Old Man Sea leave so much of a clue to its mysteries. It is because he restored these missing ships to human ken that another chapter could be written of their disappearance.

A Strange Coincidence

Peter Archer, a six-year-old boy, of Hull, England, who was knocked down by a motor omnibus and seriously injured, was being taken in an automobile to Hull Royal Infirmary, when the ambulance was stopped for a man who had been injured at work. He proved to be the injured boy's father.

Mrs. Brown eyed the joint critically. "Tell your master," she said to the butcher's boy, "that I shall buy my meat elsewhere if he doesn't correct the error of his 'weights'."

"Have you ever heard of mountains that fall?"
"No, and don't expect I ever shall."—Lustige Sächse, Leipzig.

W. N. U. 1805

To Assist Farmers

Saskatchewan Farmers In Dried Out Areas May Import Fodder Free Of Transportation Costs

Farmers in the drought-affected areas of Saskatchewan, forced by circumstances to import fodder for their live stock, will be able to do so free of all transportation costs, according to an agreement between the Government of Saskatchewan on the one hand, and the two railway companies on the other. Freight charges on fodder supplies into, and on hauling outfits from, the dried out districts will be borne jointly by the government and the railway companies. Under the arrangement, the provincial government undertakes to pay the freight charges which the railway companies undertake to reduce 50 per cent, according to Frank W. Thompson, chairman of the Canadian Freight Association.

New Varieties Of Rust-Resisting Wheat

But Production Not Yet Sufficient For Seed Distribution

Two or three varieties of wheat which will resist rust have been developed by the Department of Agriculture, it was stated by Dr. J. H. Griesdale, Deputy Minister of the department. "Our experiments this year confirm the earlier prospects," said Dr. Griesdale. "No names have yet been given the new varieties, and it will be two or three years before they can be produced in sufficient quantities for seed distribution, but we feel confident that we have the kind now that will resist the known varieties of rust."

NOVEL NECKLINE

A printed silk crepe in semi-sports type so suitable for in-between-season wear, to freshen up summer wardrobe. It is in flattering capucine tones with brown trim. The neckline is especially becoming with rolled collar in deep open V-shape with jabot frill attached below tab closing. The hip yoke of skirt takes dip at front, inverted plait at centre provides fullness to flare hem in motion. Sleeves have applied trimming straps. Style No. 627 comes in sizes 16, 18 and 20 years. 36, 38, 40 and 42 inches bust. In the medium size, 3 1/2 yards of 39-inch material with yard of 35-inch contrast is sufficient. Plain silk crepe in tomato red is youthful. Sautan beige silk crepe, Riviera-blue georgette crepe, wood-violet crepe de chine, purple cactus crepe and wool jersey in almond green are ideal combinations. Pattern price 25 cents in stamps or coin (not in paper). Wrap coin carefully.

Canada's Dairy Industry

Canadians Are Eating More Butter Than Ever Before

Dairying is a rather flourishing business in Canada right now. Canada is eating more butter than ever before. We are large consumers of this product. In 1928 we consumed 29.31 pounds per capita in this country as against about 18 pounds per capita in the United States. This is accounted for partly by the elimination of oleo-margarine from our market, although it is sold in the States. Also our butter is a better butter and induces a liberal use.

The only real competition our dairymen face is in New Zealand butter, which is imported during the winter months, in small but increasing quantities. Canadian producers find that their storage product must compete against the fresh New Zealand product and the competition is difficult. But the effect of the importation has been exaggerated.

In cheese, Canada is building up a commanding position throughout the world. This is due chiefly to the fact that Canadian Cheddar Cheese is of high quality and sells at a premium in British markets over other imported cheese. This fact was referred to in a recent article in the Canadian Business Review, published by Cockfield, Brown & Co., advertising and merchandising experts of Montreal. The article was from the pen of Duncan Marshall, former minister of agriculture in Alberta, who is now a member of their staff.

There is a lesson in our experience with cheese. By improving quality, by grading properly and by establishing good marketing facilities we have put our cheese beyond the range of competition. Given proper leadership by Dominion and provincial departments of agriculture, our butter producers could do the same thing.

The greatest danger in the dairy business at the present time is within rather than outside of the industry. It lies in the fact that the demand for cows is so great that many men are tempted to break up their foundation herds when they should be building them up.—Financial Post.

To Exterminate Insects

Electric Light Rays Are Now Used With Good Effect

Light rays and electricity are being used in exterminating insect pests. Electric light traps, consisting of a lamp set directly over a pan of water upon which a covering of oil has been poured, entices the insect, who invariably falls into the film of oil and is unable to arise. An electrified screen stable door has proved feasible. The screen is charged with high voltage static, deadly to pests but harmless to humans.

Boy friend (telling fiancée): Hello, dear, would you like to have dinner with me tonight?
She: "I'd love to."
He: "Well, tell your mother I'll be over early."

The culture can see from a great height, while the chick, or the wren, will pick at objects so small that the human eye misses them.

Held Important Military Posts

Brig.-Gen. Sir Gilbert Clayton, high commissioner for Iraq, who is dead after collapsing following a polo game. Sir Gilbert was 54 years of age, and had held several important military posts.

Rambouillet Sheep

Considered To Be The Best Breed For The Beginner To Raise

Although not well known in the province of Manitoba, the Rambouillet breed of sheep enjoys a wider distribution on the North American continent than almost any other breed. They possess some very desirable characteristics, in that they are unusually hardy, and free from most diseases that affect sheep. They have an excellent quality of wool, the ewes make excellent mothers, and through a foundation of Rambouillets, a high class flock of any of the blackface breeds may be quickly developed by the farmer who pays careful attention to his breeding practices. There is no doubt but that the Rambouillet breed is the best for the beginner in sheep, owing to the fact that generations of breeding on the large ranges, has developed in this breed, a remarkable ability to take care of themselves under any conditions. The sheep that are being supplied to Manitoba farmers by the Manitoba Livestock Credit Company, this fall, are a carefully selected lot of the Rambouillet breed.

Lord Macduff, the young son of Prince and Princess Arthur, of Connaught, had just learned the words of the national anthem, and he told his nurse he wanted to see "Our Noble King."

One day, when the King was walking in the grounds at Bagshot with the Duke of Connaught, Lord Macduff was told by his nurse, "Look, there is the King, with Grandfather."

"Oh, no," said little Lord Macduff, "that is not the King, that is my Uncle George."

The only place a woman cannot attain her point is on a lead pencil.

The French perfumery industry is valued at \$36,000,000 a year.

President Inspects Resort

Among the many places visited by E. W. Beatty, chairman and president of the Canadian Pacific Railway, and the directors who are now on a tour of the company's properties in the west, was the famous fishing and hunting resort at Nipigon. Mr. Beatty is seen accepting a bouquet of Nipigon Chrysanthemums from Miss Esme Porter, daughter of the operator at Nipigon Depot, and is also shown conversing with Tom Running Deer, Indian guide attached to the camp. The president and directors spent several hours in the camp on their way to the west.

Daily News Bulletin Service To Be Supplied Residents Of Far North By Edmonton Station

West Cong Ahead

Sir Henry Thornton Takes Note Of Developments On Trip To Western Canada

"There is a silver lining to the cloud insofar as the situation in Western Canada is concerned," stated Sir Henry Thornton, chairman and president of the Canadian National Railways, on returning to his headquarters in Montreal, after a tour which took him throughout the Western Provinces and to the Pacific Coast.

"While it is true that the West is not harvesting such a voluminous crop as in average years, and it is also true that some farmers and some districts are hard hit, it must be remembered that there are districts and farmers in those districts who have harvested better crops than they anticipated a short time ago, and who are reaping the benefit of higher prices from their belated grain from last year, and also higher prices for the grain which they have produced in 1929."

The West has gone ahead and is going ahead; building up on a basis of sound progress, and one going from the East cannot fail to be impressed with the same developments which is taking place on all sides.

"On the Pacific Coast, in particular, the development of trade with the Orient is being closely followed, and there is also a realization of the fact that Canada is sharing and will share to a greater degree in the further development of that trade," Sir Henry said, concluding with the statement that he had inspected the properties of the system in each of the provinces visited and he had found things in good condition everywhere with the officers and employees keenly on the alert to provide the best service to its patrons.

Russian Farm Uses

Machinery Exclusively Soviet Grain Trust Cultivated 350,000 Acres Of Land This Year

M. Kalmansonovich, head of the Soviet Grain Trust, when in New York recently, stated that the Grain Trust cultivated 350,000 acres of land this year. It was formed last year to organize and operate large grain farms entirely by machinery. The Giant Farm in the Northern Caucasus, has a cultivated area of 120,000 acres. The sowing period of this farm lasted only 9 days, 650 tractors being involved. This is the world's largest farm using machinery exclusively. The Soviet Government has allotted 4,000,000 acres of land to the Grain Trust this year. Out of this total 2,250,000 acres will be sown next winter and spring. The plans for 1931 call for the cultivation of nearly 6,000,000 acres out of a total of 11,000,000 acres that the Grain Trust will have under its control in that year. The Soviet Government has a machinery and tractor service, with a capital of \$25,000,000, which operates fleets of tractors to cultivate peasant land. The stations of the State Machinery and Tractor Service, which are expected to plough nearly 2,500,000 acres next year, will receive in payment for their services a part of the crop ploughed.

Large Ranch Authorized

Southern Alberta Company Is Holding 99,881 Acres In Lease

The days of vast ranches have not altogether passed from the prairies. The Canada Gazette recently authorized the Pignon Ranching Company, which operates south of Medicine Hat, in Southern Alberta, to hold 99,881 acres in lease in spite of the official regulations which limit holdings to 25,000 acres. The Pignon Ranching Company owns 3,000 cattle, 100 head of saddle and work horses, and 50 head of pure-bred Hereford and Shorthorn bulls.

Goes To Eastern University

Dr. L. A. Munro, assistant professor of chemistry at Manitoba Agricultural College for the past four years, has severed his connection there, and leaves for Kingston, Ont., where he has accepted a position as assistant professor of chemistry at Queen's University. Dr. Munro took his Bachelor's and Master's in Arts at Dalhousie, and his Ph.D. from McGill, and joins Queens with the best of academic and practical training.

Some gourds weigh as much as 80 pounds.

Residents of Aklayk and other points inland and outside the Arctic circle in the far north are to be given a daily news bulletin through the action of Hon. Charles Stewart, minister of the interior, who with the co-operation of the Royal Canadian Corps of Signallers has inaugurated a wireless news service which will do much to improve the isolation of those pioneer men and women—traders, ranchers, trappers, prospectors, missionaries, doctors, teachers and members of the Royal Canadian Mounted Police who are carrying civilization into the far north.

For the past few years the residents of the Mackenzie District have had the benefit of the wireless service for telegraphic purposes. Stations at Fort Smith, Resolution and Simpson, in the valley, and Aklayk and Herschel on the Arctic coast, have been linked up in this manner with the R.C.C.S. station at Edmonton, but only commercial and urgent private messages have been handled.

However, Mr. Stewart felt that something more could be done with the equipment, and he has now, in co-operation with the department of national defence, made arrangements whereby every day one of the officers of the Department of the Interior, at Edmonton, prepares a 500-word bulletin of news of special interest to northern residents, to be broadcast to the receiving stations of the north.

The bulletins thus received are posted at the local offices of the North West Territories and Yukon branch, and at all police posts where they are obtainable, and which they can be read without charge by the residents of the various settlements.

The work has been placed in the hands of assistant commissioner of Dominion lands, R. B. Matheson, at Edmonton, and the first 500 word bulletin has been sent out. The news bulletin will be continued without interruption as far as possible, and according to northerners now in the city will prove of inestimable benefit to people living in the outlying sections who will thus be kept in touch with world events and Canadian happenings of particular interest to them.

Describing a Canadian

Immigration Act Leaves No Room For Argument

From time to time the question is asked: "What is a Canadian?" There is an agitation for provision in the census defining Canadians and it is likely this will be done in the next census two years hence.

As a matter of fact, a Canadian is clearly described in the Immigration Act as follows:

"(i) A person born in Canada who has not become an alien; (ii) A British subject who has Canadian domicile; or (iii) A person naturalized under the laws of Canada, who has not subsequently become an alien or lost Canadian domicile."

This would appear to meet the case adequately.

Investigate Movie Industry

Professor Kenneth W. Taylor, of the economics department of McMaster University, has been appointed by Hon. Peter Heenan, minister of labor, to assist in the preliminary inquiry, under the Dominion Combines Investigation Act, into the alleged combine in the motion picture industry in Canada, it was announced by the Department of Labor.

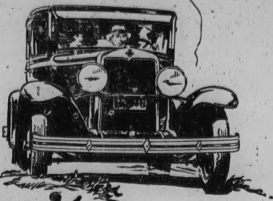

Whether an individual who owns a piece of property can own the air above it, and whether he may sell or lease the air, is a disputed legal matter.

Sugar is found in the sap of nearly 200 plants and trees.

"You are lucky in love, Mr. Du-pont?"

"Exceedingly—I am still a bachelor."—Moustique, Charleroi.

Don't buy any car until you have driven Chevrolet

IT'S all very well to listen to So-and-so's opinion of car values, but after all, the person whose opinion counts most is YOURSELF. It's all very well to sit back and wonder how Chevrolet can produce a really high-class Six . . . put a high-compression, valve-in-head engine in it . . . employ Fisher Body genius to create and build a series of magnificent bodies for it . . . equip it in the most detailed and up-to-the-minute fashion . . . and sell it at the price of a four.

The unmatched resources of General Motors, backing up Chevrolet's own tremendous facilities, explain all that, of course. But how much more satisfying to test it all out for yourself . . . behind the wheel of the new Chevrolet Six. That is why we urge you . . . no matter how many nice things you have heard or read about Chevrolet . . . to DRIVE CHEVROLET before you buy any car.

If you don't sell yourself a Chevrolet, nobody else is going to do it. Please don't feel you are obligating yourself in any way. It's a pleasure for us to place a Chevrolet Six at your disposal.

VIKING

A number of men gathered at the N. C. Graham home last Friday evening and enjoyed a duck dinner. J. M. Brydges, a visitor from Edmonton, was the guest of honor, and being a hunter of some repute, was responsible for some of the fine birds that disappeared off the table, and attested to the fact that all the ducks won't winter in the south. After feeding time, the boys filled up their pipes, or smoked a choice havanna, talked of days gone by in the woods and on the lakes where the moose calls and the big fish lies that was almost caught. Some old time community songs and some not so old were sung with gusto after which the "stars" went home and told their wives what a swell time was had by all.

A. L. Horton and Hank Bender, of Vegreville, blew into town Tuesday morning after a hunt between here and that burg. We didn't see any tangible results of their prowess with the old blunderbuss, but Hank told us confidentially that he pointed out the good shots for A. L. but he missed 'em. As any rate the alkali that they were wild (the ducks) and that they were scarier than the proverbial hen's teeth, managed to get them by the local nimrods without a smile. Incidentally they boosted the Elks carnival at Vegreville from October 15th to 16th, and invited the world to come and view the wonders at the arena at two bits a throw. And if you are lucky you will win something to take home to the wife, so you can have another night out by and by.

The magical revue as presented by Messrs Butler & Darby in the community hall Tuesday evening drew a fair sized crowd. The entertainment was of a high class order and these gentlemen gave a fine program of magic, mysteries, ventriloquism, and crystal gazing. The crystal gazing was quite uncanny and some of those who asked questions were astounded at some of the answers received. The dance that followed the performance also was well attended, music being furnished by the Jolly Sparks.

The Rich schoolhouse which has recently been remodeled was opened with a big dance last Friday evening and a large crowd was present at the festivities. The Bruce orchestra furnished music which was voted to be of the best. Refreshments were served. The Rich School is now one of the finest appearing rural school houses in the district.

A hydroplane used Lake Thomas as a landing place Tuesday afternoon. Presumably the machine experienced some trouble, as after the mechanics and pilots had made some repairs they again took off going in an easterly direction. The letters on the plane were CF-CGA. The occupants did not come to shore so their identity is unknown.

Mr. and Mrs. E. W. Johns and family motored to Edmonton over the week end to visit with their daughter Miss Vera who is attending business college in the city.

Mr. and Mrs. J. J. Leeder and children returned on Saturday from a motor trip to Caintown, Ontario, and other eastern points. They report a very enjoyable vacation. They left here on August 29th.

Mr. and Mrs. C. Skinner were down from Edmonton over the week-end enjoying a visit at the J. L. Dadds home. While here Cliff had a good duck shoot with "Grandpa" Dadds.

Fred Thoresen, of Delmas, Sask., motored over for a few days visit at the home of his daughters, Mrs. T. Mackey of this district, and Mrs. P. Jorres of Irma.

Miss Davis, of Selkirk, who has been a guest at the home of Dr. and Mrs. Saunders returned on Tuesday to her home accompanied by little Jackie Saunders.

Last Thursday was "night out" for the members of the Elks Lodge, and a real old time smoker was enjoyed in the new big hall. There was something doing every minute until the boys dispersed at about one o'clock.

"Red" Martin has been engaged by the rink committee as caretaker for the curling and skating rink for the coming season.

Herb Welton and his mother were up from Alask, Sask., over the week end looking after their farming interests in this district.

Mr. Adams, of Vegreville, returned home on Tuesday after paying a visit at the home of his daughter Mrs. H. A. Meredith.

Mr. and Mrs. Stock and daughter Maxine spent the week end at Edmonton, and Alberta Beach at the home of Mr. Stock's parents.

The chairs for the new hall are expected to arrive from the east this Saturday.

George Moore, of the St. Paul district, is in town visiting with relatives and renewing acquaintances.

R. V. Patterson, representing the S. S. B., Vegreville district, was in town the first of the week.

Household Hints

Pineapple Carrot Salad

1 Cup shredded Pineapple, 3-4 cup grated carrot, 1 tablespoon granulated gelatine, 1-4 cup cold water, 1-4 cups Pineapple syrup, 1-2 cup sugar, salt, 3-3 cup of lemon juice.
Mix gelatine in cold water, let stand until Gelatine absorbs water, add boiling syrup, stir until dissolved. Add sugar and salt, stir until dissolved, add lemon juice. Set aside until partly cold then add pineapple and carrot and pour into moulds. Serve with dressing.

Vegetable Salad

1-2 cups finely shredded cabbage, 1 cup grated carrots, 1-2 cup grated cheese, 1-2 tsp salt, 2 table spoons lemon juice, salad dressing, mix cabbage, carrots and cheese, add lemon juice last.

Boiled Dressing

1 Egg, 2 tablespoons sugar, 1-2 tsp salt, 2 tsp dry mustard, 1-8 tsp paprika, 1-4 cup vinegar, 3-4 cup mayonnaise oil, 1 tablespoons cornstarch, 1 cup water.

Method: Put egg, sugar and seasoning, vinegar and oil in mixing bowl but do not stir, make a paste by mixing corn starch with half cup of water. Add the additional half cup water and cook over slow fire, stirring constantly until it boils and clears up. Add the hot cornstarch mixture to the ingredients in the mixing bowl and beat briskly with the egg beater. Cool before serving.

Boiled Dressing

1-4 tsp salt, 1 tsp mustard, 1-2 tablespoons sugar, 2 eggs cayenne, 2 tablespoons flour, 1 egg or yolks of 2 eggs, 1-2 tablespoon melted butter, 3-4 cup milk, 1-4 cup vinegar.
Mix dry ingredients, add eggs slightly beaten, butter, milk and vinegar very slowly, cook over boiling water until mixture thickens.

Sweet Dressing

Boil 1 cup sugar (less) 1-2 cup water, 5 minutes. Pour gradually into 2 beaten egg yolks. Cook over hot water stirring constantly until slightly thick. Add juice of two lemons, then the beaten whites of the eggs a minute or so before taken from fire.

HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOC. FOOD FADS

The individual who desires to live a healthy life and to eat as he should finds it difficult to decide as to his proper food because of the number of fads which are shouted from the house tops and advertised in striking and convincing ways. It is not possible even to mention all the food fads in a brief space, let alone to attempt to discuss them. Merely a few of the outstanding fallacies of the claims will be mentioned in order to guide the reader in considering this important subject.

That one individual apparently prospers on an unusual diet is no reason for believing that such a diet is generally suitable; any more than it is reasonable to say that all men should be marathon runners because one man does well on that type of exercise. There is no evidence to show that vegetarians enjoy better health, or that they live longer than those who use meat. It has been pointed out that two of the most remarkable recent medical discoveries—liver extract as a treatment for pernicious anaemia and insulin for the treatment of diabetes—are two extracts of meat which are life saving.

There is no scientific evidence which supports the idea that cancer has anything to do with the use of refined foods, such as white bread, or the eating of meat. There is no foundation for the idea that the dangerous food combination, which is based on the idea that certain foods should not be eaten together, as one interferes with the digestion of the other. There is no particular food in order to secure some constituent, such as iron or calcium. There is no objection to these foods, but it is a variety of foods, including milk, green leafy vegetables and fruits, which ensures a sufficient quantity of minerals and vitamins for the adult.

The foundation of health is moderation. Do not eat too much. Eat slowly. Eat regularly. Use milk and milk products, green leafy vegetables and fruits regularly.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

WHERE IS THIS MAN?

The press has been asked to help locate one Alexander J. MacLean, who is the son of John MacLean and Mary A. Gillis. The missing person was born in Prince Edward Island but was brought up from his youth at Gillis Cove, Nova Scotia, and would now be about forty years of age. Anyone knowing of his whereabouts should wire Chester J. O'Brien, counsel at law, 185 Devonshire Street, Boston, Mass. The missing man must be found within two months in order to claim an estate.

WARNING

to Motor Car Drivers

CARRY Your Licences

The Vehicles and Highway Traffic Act, 1924, Amendment Act 1929, requires that every person operating a motor vehicle shall secure an operator's or chauffeur's licence and shall at all times while driving carry same. A penalty is provided for failure to produce such licences when demanded by an officer.

It is necessary, owing to the number of motorists who persist in driving without licences, that the police be instructed to require the production of these licenses from time to time.

This law has been passed in the interests of safe driving, and the production of a licence is the only proof of ownership of one.

Carry your licence at all times and avoid inconvenience and prosecution.

Application cards may be obtained from any Alberta Police Officer, Clerks of the Court, dealers in motor vehicles, or from the postmaster in any town or village, and when completed should be forwarded to the Motor Vehicle Branch Office at either Calgary, Lethbridge or Medicine Hat, or to the Office of the Deputy Provincial Secretary at Edmonton.

HON. J. E. BROWNLEE,
Provincial Secretary.

E. TROWBRIDGE,
Deputy Provincial Secretary.

"The World's Mine Oyster," Said Falstaff

EMPEROR OF AUSTRALIA LEAVING NEW YORK

JAPANESE DANCING GIRL

"OLD NEPTUNE COMES ABOARD"

"Why, then the world's mine oyster which I with sword will open," said a famous character of Shakespeare, but the modern version relates to going around the world in a big and comfortable steamship with no sword to open the oyster. These are days of peace and world travelers now planning their tours will be interested to know that one globe-girdling liner will call at ports hitherto omitted from her itinerary—ports rarely touched by cruising steamers. The "Empress of Australia," a 21,500 gross ton vessel, long a favorite with globe-trotters, will sail from New York December 1, 1929, on the seventh annual Canadian Pacific World

Cruise. Besides making her regular visits to the highlights of the Mediterranean, to India, Japan, China, Hawaii and other fascinating places, her itinerary this time has been extended to include Athens in Greece, Paknam and Bangkok in Siam, with further calls at Keelung for Taikoku, in Formosa. She will be gone 137 days, visiting 61 ports and places in 24 countries. Athens is really three towns in one—the twisted lanes of the Athens that was little more than a Turkish village before the Greek War of Independence, the broad straight streets of the modern capital, and the interesting ruins clustering round the Acropolis representing "the Glory that was Greece." The Parthenon, one of the most interesting ruins here, was chief among the buildings with which Pericles adorned the Acropolis about 600 B.C. Bangkok, the capital of Siam, was originally built on floating

pontoons or piles on the river's edge, but nowadays well-planned roads and streets radiate from the city in all directions, beautiful Buddhist temples are scattered all over the town, and the Royal Palace is one of the show places of Bangkok. Keelung, the chief port of the Island of Formosa, is a hive of industry. Formosa is half the size of Ireland and is governed by the Japanese. In its northern fastnesses, still largely unexplored, lived the headhunters. The Japanese campaign of subjugation, however, has all but wiped out these barbarous people. The seat of government at Formosa is Taihoku. Here fleets of jirikishas, manned by coolies, transport the visitors around the town, one of the chief attractions of which is the Governor-General's garden, where the world's most beautiful tropical plants bloom in exotic profusion.

WORLD HAPPENINGS BRIEFLY TOLD

Great Britain in 1923 had the lowest infant death-rate ever recorded. Out of every 1,000 children who lived to be one year old, only 65 died.

The population of Saskatoon is nearing the 50,000 mark, according to 1923 issue of Hendersson's Directory. It is now estimated by the publishers that this city has 47,653 residents.

The Aero Arctic Association has announced that financial backing has been obtained for the Arctic expedition of the Graf Zeppelin next spring. Dr. Hugo Eckener, commander of the dirigible, will have 45 persons with him on the flight.

The promotion of Charles Clifton Perry from the post of Indian agent at Vancouver to that of assistant Indian commissioner for British Columbia, at Victoria, has been announced by the civil service commission.

Some of the first issue of Danish cancer stamps have been seen in London. These stamps, issued by Denmark to benefit the Danish cancer fund, are in three colors, red, green and blue, in three denominations. All bear the Mercury wand design.

It's just as easy to get wrong numbers at sea now as it is at home. Telephone booths and other conveniences have been built on the steamship *Boomerang* for regular land communication while the ship is going between England and other countries.

A reward of \$1,000 has been offered by the provincial government for information leading to the arrest and conviction of person or persons in the Doukhobor district responsible for the burning of schools throughout the area. This announcement was made by M. A. MacPherson, attorney-general.

The Newspaper Guide

Advertisements Are To Shoppers What Time-Table Is To Traveller

The newspaper that carries a good line of advertisements is to the shopper what the time-table is to the traveller and the published guide to the tourist. Busy people start to study these advertisements in the home or in the office, and before they start shopping they know where they are going. In fact, business places are points of interest to all tourists, and the non-advertiser puts himself outside the pale so far as strangers are concerned.

Edmonton Building Permits

Building permits in Edmonton topped the \$4,000,000 mark this year, up to the end of August, being \$4,188,290 or more than a million above the similar eight-month period of last year.

Extending Radio In Arctic

Russia is rapidly radiating its Arctic possessions. The radio and meteorological station at Franz Joseph Land already is functioning, and another is being constructed on Wrangel Island.

A Bible from the Russian Imperial Palace of Tsarokoye Selo, its cover encrusted with diamonds and emeralds, was recently offered for sale in England.

"Come and sit on my lap, Fritz."
"But grandma, you are sitting on it yourself."—Hummel, Hamburg.

W. N. U. 1905

Germany Planning World Plane Lines

Company Aims For Regular Flying Boat Service Over Atlantic In Two Years

A gigantic network of air lines which will cover the entire world is being planned by Lufthansa, Germany's most important air company. The plans are being worked out by Otto Merkel, who has given up his post as head of Lufthansa to devote himself to founding an international company, which promises within two years to open regular air lines between Europe and the United States.

Working jointly with the Hamburg-American steamship line, preliminaries have been completed. The details of the new company are still somewhat uncertain, but the approximate direction of developments has been mapped out.

"Not only is the world's interest concentrated in air travel, but in all countries the best technical experts are working out the details," said Herr Merkel. "The experimental stage is behind us and the goal is clear. We have fine planes, especially in America, excellent motors, and everywhere responsible pilots and dependable instruments which will result in an even higher standard soon."

Device Registers Accidents

New Invention To Help Catch Hit-and-Run Drivers

A device to catch "hit-and-run" drivers of automobiles has been made by a Berlin inventor named Rudolf Hofmann. The mechanism is described as "an automatic traffic protector."

It is adjusted under the chassis of an automobile and at the instant of any impact automatically raises a white plate with a warning red light above the car's license plate. It also registers the automobile's speed.

PARIS COTTON-FROCK

It is quite possible to appear smart, dainty and comfortable this season, because Paris decrees the sheer printed cottons are the newest choice for summery wear. Style No. 562 is strikingly effective in printed cotton voile. It is in flattering capucine tones which enhances the charm of the sun-tan complexion. The applied yoke of bodice which boasts of modern influence, is in plain voile in blending tone which appears again in circular inset of skirt. The hip-line is given a swathed effect through drape of skirt. It is a fetching dress for town or resort. It comes in sizes 16, 18 and 20 years, 36, 38, 40, 42, 44 and 46 inches bust. Printed lawn, sheer linen in pastel or print, flowered chiffon, shantung, printed rajah silk, crepe de chine, and georgette crepe appropriate. Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

World Famous Artists On Canadian Radio

HAROLD BAUER

FLORENCE AUSTRAL

Florence Austral, the world's greatest dramatic soprano and Harold Bauer, one of the outstanding pianists of all time, two of the world famous artists who will be heard on the air this season during the Imperial Oil Hour of Fine Music, to be broadcast from Toronto every Sunday evening, beginning on October 6th, from 8 to 9 Central Standard Time. Miss Austral performs the series on Sunday evening, October 6th and Mr. Bauer will be heard on October 20th.

Announcement of a series of concerts by world famous artists on a Canadian radio chain was made yesterday by F. J. Wolfe, Director of Imperial Oil, Limited. The series will begin on October 6th and will continue for twenty-six weeks. It will be broadcast through stations at Montreal, Ottawa, Toronto, London, Waterloo, Winnipeg, Saskatoon, Regina and Red Deer and, with the completion of hook-up facilities at the end of the year, at Vancouver.

Among the universally known artists who have been engaged for this series are Florence Austral, the world's greatest dramatic soprano; Sophie Braslin, the great contralto; Harold Bauer, one of the outstanding pianists; Richard Crooks, the American tenor who, though only twenty-eight years of age has scored notable triumphs in Europe and America; Lea Luboshutz, who is said to be the greatest of all women violinists; Hans Klinger, the famous Dutch cellist; The London String Quartet; Albert Spalding, great violinist; Lucella Malus, one of the most famous coloratura sopranos; Josef Lhevinne, the great Russian pianist; Richard Bonelli, leading baritone of the Chicago Opera; The Kedroff Quartet, formerly of the Imperial Palace at Petrograd, and others.

The series will consist principally of symphony concerts at most of

which one or more of these famous artists will assist. A great symphony orchestra of more than fifty players has been engaged and will be under the direction of Reginald Stewart, who has lately returned from a concert tour in Europe, and who has been engaged as a guest conductor for the London Symphony Orchestra in April next. The concerts will originate in Toronto and will be offered from 10 to 11 o'clock Eastern Standard Time for twenty-six consecutive Sunday evenings, beginning October 6th.

"Our object in promoting these concerts," Mr. Wolfe said, "is to bring to people within reach of available hook-up facilities in Canada, music and artists which, without the medium of radio, could not be heard outside the great metropolitan centres. We do not regard radio broadcasting as a direct advertising medium and feel that it can function most usefully in purveying entertainment of educational and artistic merit. The aim of the orchestra and guest artists will be to broadcast classical music and modern novelties of more than ordinary merit."

The series, which will be known as The Imperial Oil Hour of Fine Music, will go on the air through stations CHVC, Montreal; CNRO, Ottawa; CKNC and CFBT, Toronto; CFCG, London; CKCR, Waterloo; CKV, Winnipeg; CHWC, Regina; CFCG, Saskatoon; and CKLA, Red Deer.

Sweden Leads the World

Sweden today leads the world in the number of radio receiving sets, in proportion to its population. The latest statistics show that there are 412,115 sets to about 6,000,000 inhabitants, or 67.5 for each thousand citizens.

Germany is holding many centenary celebrations this year.

Tall Men's Association

Crusader Is Trying To Make Path Easier For His Elongated Brethren

Things are coming to a sorry pass for tall men, Benjamin Ostling of Marshfield, Ore., president of the Tall Men's Association, of America, indicated on a visit to Cleveland.

The tall man suffers one agony after another, in Ostling's opinion, and the more he has to travel the more his troubles mount. For instance, take the Pullman berth, the standard size hotel bed and the regulation size bath tub.

Ostling is a crusader for the man who towers into the atmosphere six feet or more, and he firmly believes that the Tall Men's Association will accomplish something while in the way of added comforts.

The organization, formed in 1923, has nearly 1,000 members, most of them from the west coast, but Ostling predicts a steady increase during the next few years. Before one is taken into this select group, he must prove his eligibility, which can easily be done with a yardstick. The only requisite is that he must be at least six feet tall.

"Tall men have to comb their hair, fix their neckties, and do other finishing touches to their dressing on the installment plan basis if the furnishings in his room are of the standard size," said Ostling. "Just try to imagine me taking a bath in the standard size tub. It just cannot be done. When a tall man sits at a regular-sized table, all the pleasure of dining is gone because of the gymnastics he has to perform to keep his legs from bumping those of the table."

"The worst sufferers are, of course, tall men who are compelled to stay days and sometimes months in hospitals. The regulation hospital bed is not too large for the man of average height. Can you imagine a tall man comfortable in them?"

"The time has come when institutions catering to guests must take into consideration the tall man's plight and make provisions for his comfort."

Several hotels in the larger cities have provided special accommodations for their tall guests. Many hospitals on the western coast have at least a dozen beds in each building for their tall patients, and one hospital has even a special operating table for tall men.

Ostling said there are at least 2,000,000 six-footers on the continent. And the ramifications of Ostling's campaign are not limited, because he even advocates larger jail cells for his more unfortunate brethren.

Saving In Train Haul

Grain shipped from Saskatoon to Liverpool by way of Montreal has to travel 5,213 miles. By way of Churchill it has to travel 3,791 miles. The distance between the two ports and Liverpool is about the same—the saving is in train and lake haulage in Canada and changes and reloading.

Take Off Over-weight

Modern science says sugar supplies energy that lets you carry on with less food and safely reduce weight.

WRIGLEY'S is pure chiclé, sugar and flavor. Chewing the chiclé dissolves the sugar and releases the flavor.

In this pleasant way you get needed body fuel and reduce the pounds.

Remarkable Self-Denial

Scottish Girl Saves Enough To Bring Family To Canada

After having been only two years in Canada, Miss Jean Turley, late of Coalburn, Lanarkshire, Scotland, has been able to bring her father, mother, and ten brothers and sisters to join her in the home which she has prepared for them in Montreal.

By denying herself every luxury she has never been inside a picture show in Canada—and saving every cent of her wages as a servant, Miss Turley was able to save part of the large family's passage money, the remainder being provided by the British Dominions Emigration Society.

Miss Turley's father found work difficult to obtain in Lanarkshire, but jobs in Montreal have been promised to all members of the family old enough to undertake them.

Miss Turley is now 23, and her brothers and sisters range from 21 to 3 years of age.

Speaking of the sacrifices which she had made for her family, Miss Turley said: "It is all over now, and I am very glad to see them."

WINDOLITE The Improved Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

WINDOLITE stands for 100 per cent. sunlight. It makes light last strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs. while a square yard of glass of ordinary thickness weighs about 135 to 140 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b. Toronto.

The Singing Fool

By HUBERT DAIL

Copyright, 1933, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, singing waiter at Blackie Joe's New York night club, was famous on Broadway as a composer of popular songs. He marries Molly Winton, a failed singer, and makes her famous, too. Molly and Al have a baby, Junior, whom Al adores. Molly becomes romantically interested in John Perry, a close friend, and Perry begs her to leave Al. On the third anniversary of his marriage Al takes Molly home from the Club Bombo, where he is part owner. She is moody; her conscience bothers her because of her behaviour with Perry. This is intensified when Al goes to the nursery and she sees how ardently he loves Junior. Later, in a burst of rage, she tells Al she doesn't love him any more. As Al recoils, Molly hears Junior calling her.

CHAPTER XV

Junior had awakened to find that his toy, his woolly dog, had dropped out of bed. So he was calling to Molly to come and get it for him.

As his high childish voice drifted through the rooms to Molly and Al they gave a start. The expression on Al's face softened in an instant. Molly's remained the same as she brushed by Al to look after Junior.

Al turned, looking after her retreating figure, still in a daze from her harsh words. He had lost her love, she actually said so herself! Her words and the heart-breaking scene he had just passed through seemed fantastic and unreal to him.

What had he done to deserve her indifference and her scorn? Then, like a man in a dream, he followed her toward the nursery. Standing in the doorway, he saw her pick up Junior's woolly dog from the floor, replace it in the child's arms, and carefully tickle him in.

"Go to sleep, now, Junior. Then Mamma can sleep too."

How strangely contrasting was that soothing voice to the tone Molly had just used in addressing Al! And how kind the expression on Molly's profile as she bent over Junior's bed! Surely this was not the end, thought Al. He suddenly determined that he would not let her life together be blasted by her whim; he would fight to reawaken Molly's love!

As Molly came toward him he raised his hand with an apologetic gesture. "Darling, can we talk this out? If I've done anything tell me!"

"No—no more talk!" Molly passed him, entering her bedroom. He heard her door close with a snap of finality.

But now Junior was sitting up, holding out his arms to his father. "Daddy, please sing me to sleep."

Al came forward swiftly, picking up Junior, holding him close as if to drive away the wound Molly had inflicted. Here, at any rate, was someone who loved him, trusted him, and always greeted him with the same adoring, happy smile. For a moment Al choked up and couldn't speak. Then he said huskily:

"What do you want me to sing, baby?"

"You know," whispered Junior confidently, "that one about a little boy like me."

"Little Feller?"

"Yes, that one."

Slowly Al began to sing, rocking Junior gently to and fro. There was only an audience of one to hear—and that a very sleepy audience—

but the tenderness and appeal of Al's words had not been matched since that night three years ago when he had sung the love ballad "Always" to touch Molly's heart.

As the song continued Junior's head drooped in drowsiness and presently his eyes closed. When Al knew that he was really asleep the rhythmic words trailed off into a whisper and silence.

Then, pressing the little form close to him for a last good-night hug, he put his son back in the bed.

Once more the tip-toeing from the room. Then Al stopped and gazed wondrously at Molly's closed door. She was still up, in the semi-darkness of the hallway he could see a faint narrow line of light under the door?

Perhaps she was already repenting of her quick, unkind words—how passionately he wished that could be true! Her pride wouldn't let her make up to him now, but perhaps in the morning.

Until the long black hours of the night faded into the gray dawn. Al sat up in bed, gazing out over the lights of the city, shaking one cigarette after another, wondering, hoping, planning.

In the morning Molly's manner was still cold, but her whip-lash tongue was silent. She avoided meeting his eyes any after she spoke. It was about necessary things concerning Junior or the household.

Al watched her, hoping to detect a softening glint in those ice-blue eyes, but there was no sign of regret. Finally he left the apartment for his own.

All through the day and evening there was an actual sharp pain in Al's heart as if a knife had been driven swiftly into him and withdrawn. But he went about his work the same as usual, trying to forget the scene of the night before.

When he saw Molly after her performance that evening he thought she was in better humor. She was not cordial, by any means, but she made some attempt to treat him courteously. His heart gave a bound; in a few days, he told himself, this mood of hers would wear off and she would be her own lovely self again.

His fate together would not be smashed, after all.

So the days passed, with Molly avoiding Al most of the time, and maintaining a certain secrecy of manner when she did talk to him. Then New Year's Eve arrived, the New Year's Eve that Al was to remember always.

It was the big night in the city's life of revelry; snow blanketed the streets, embellishing the roofs and facades of the houses and skyscrapers, emphasizing the dazzling fantasy of brilliant Broadway.

At the Club Bombo the cause of "whoopie" had its most devoted adherents. The crowd in evening dress were tiny carnival hats and danced

with the true spirit of abandon as midnight approached. Long streams of confetti in brilliant red, green, blue, yellow and purple were shot across the room, describing graceful curves before they fell across the dining tables and the shoulders of the dancers. It was the biggest crowd the Bombo had ever entertained and on the raised orchestra platform, stood Al, wearing a fantastic head-piece, a megaphone in his hands. He was leading the merriest, but the ache in his heart was still present.

Perhaps, he thought, the unrestrained gaiety of this night would change Molly's mood so she would become her old, friendly self. He gave a hurried glance toward the reserved table; she should be here by now. Then came the distracting business of introducing the celebrities, and once more he glanced at the vacant table and consulted his watch. Molly was at least a half hour late. He nodded toward the orchestra leader, signalling for another dance.

As the dancers swept toward the floor he retreated among the tables. What was keeping Molly? He could hear the shrieks of the strens from outside—the New Year had arrived, the time when feuds and misunderstandings are forgotten, new resolutions are made, and life begins anew. All this, he hoped desperately, would influence Molly.

The orchestra was playing with staccato brilliancy and abandon, the couples swayed and snuggled and called to one another.

"Choose a partner yourself!" cried a friend passing clapping Al on the shoulder. Al laughed in answer, but a moment later he moved toward the phone room at the rear. Perhaps Molly had gone straight home from the theatre—he must find out!

The phone room was a sort of alcove, with three or four booths. Al entered one, pulling the door shut and calling his apartment number.

But the door suddenly drifted open, allowing a roar of happy sounds to enter. Just then he heard a feminine voice at the other end of the wire. Molly's voice, he thought. He quickly pulled the door shut again and said:

"Molly, dearest, I've been holding your table for you—hoping you'd come."

But again the door flew open and he missed the answer.

(To Be Continued.)

Intends To Collect Pay

Circus War Carrier Inherits Fortune But Wants His Fare

A 21-year-old \$84-week war carrier for a circus playing in Portland, remained at his post under the white tops and refused to leave to collect a \$275,000 inheritance available in Los Angeles, because he declared, the circus owes him \$60 "hold back" money, which he won't get if he leaves.

The youth, Robert J. Sterling, of Philadelphia, said he would remain with the circus until it reached Los Angeles, where he would answer personally the telegram received from an attorney informing him of the inheritance left by his father.

Sterling said when the Radio Corporation of America was organized his father operated a radio shop in Philadelphia and purchased a few shares of stock in the corporation.

When the elder Sterling died in 1927, Robert said, he left the stock in keeping of a Los Angeles attorney until Robert became of age. Young Sterling became 21 years old on January 20, but he said he was so "bony" that the cook house ice tanks with water, that he paid little attention to the attorney's notice.

To have the children sound and healthy is the first care of a mother. They cannot be healthy if troubled with worms. Use Mother Graves Worm Exterminator.

Paris Is Particular

Unaccompanied Women Are Refused Service In Many Cafes

Numerous cafes in Paris still refuse to serve unaccompanied women and the newspapers have taken up the question of the removal of the ban. They argue that times have changed and that women should be catered to even when alone. The fact seems surprising from a New World point of view. On this side of the water nowadays women go unaccompanied to theatres, cafes, hotels and all other public places, and the fact of their being alone is unobserved.

Applies To Every Nation

If China and Russia should go to war ninety-five per cent. of the population of either country wouldn't know what was all about. But that is pretty nearly the case with a war in any nation.

Says Vancouver Best Outlet

Nothing In Way Of Branch Lines For Peace River District Declares Beatty

"When rail connection is established between the Peace River District and the Pacific coast, it would appear that Vancouver would be the logical point for the outlet on the coast," declared E. W. Beatty, president of the Canadian Pacific Railway, who returned to Vancouver Wednesday from Victoria.

Mr. Beatty was non-committal as to when and how rail connection between the coast and the Peace River area should be made. He suggested that coast connection would be the natural consequence of developments in the Peace area, and intimated that it might not be advisable to undertake the great expenditure until the period had arrived when no mistake could be made.

Regarding the Pacific Great Eastern Railway situation, Mr. Beatty said that it would be time enough to discuss that matter when the survey was under way by the provincial government, the Canadian Pacific and the Canadian National has been completed, and that the directors of this road, jointly owned by the Canadian Pacific and the Canadian National will likely have some announcement to make at the end of the year.

Answering a direct question as to whether there is any obstacle in the way of a branch of this road being run into British Columbia block of the Peace River area in order to give relief to farmers now located from 80 to 100 miles from the railroad at Hythe, he said that he saw no reason why it could not be done.

THE RESPONSIBILITY OF EVERY MOTHER

The child in the home is a never-failing source of joy, but, at the same time a never-failing responsibility to the fond mother. It is not infrequently happens that minor ailments of the child distress, and puzzle her. She does not know just what to do, yet feels them not serious enough to warrant calling in the doctor. At just such times as these it is found that Baby's Own Tablets are the mothers greatest help and friend.

Most childhood ailments arise in the digestive tract—the bowels be troubled with constipation, sour Baby's Own Tablets are a never-failing relief for this condition. They ease the stomach, soothe the stomach and bowels they banish constipation and indigestion; break up colds and croup, soothe the throat and ease the pain accompanying the cutting of teeth and promote health-giving sleep. Concerning them Mrs. W. Jennings, Mackay, Ont., writes: "I have used Baby's Own Tablets and I can say highly of them. I would not be without them. Please send me your little booklet on the care of children."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont.

Proposed Fish Cannery For Manitoba

According to the "Canadian Fisherman," a fish cannery is being proposed to pack fish products of the Manitoba lakes. It is also reported that efforts are to be made to utilize the large available quantity of coarse fish and fish offal from the Manitoba fisheries and stock feed manufacture.

Do not allow worms to sap the vitality of your children. If not attended to, worms may weaken the constitution of the child. The little sufferers cannot voice their ailment, but there are many signs by which mothers are made aware that a dose of Miller's Worm Powders is necessary. These powders act quickly and will expel worms from the system without any inconvenience to the child.

Works Both Ways

You will find, young man, that as long as you have to work for a living the job you are on, or somebody working with you, that you don't don't like. Forget it and look to the future. Some other fellow may feel the same about you.

Minard's Liniment For Warts.

England has had only one king who grew to manhood and who never married. He was William Rufus, or William II, son and successor of William the Conqueror.

Real Dyes are easier to use

DIAMOND DYES are used by the highest quality dyes in the world. They go on easier, though—more smoothly and evenly, without spotting or streaking. That's because they are made from real anilines, without a trace of fillers to cause fabrics to give things that dyed look.

Diamond Dyes contain the highest quality anilines that money can buy. That's why they give such clear, bright, new-looking colors, which keep their depth and brilliance so remarkably through wear and washings.

Next time you have dyeing to do, try Diamond Dyes—at our risk. See that they are easier to use. Then compare results. You will surely agree.

Diamond Dyes

Sun Proof
EASY TO USE—BETTER RESULTS

Strange Aerial Cargoes

Airplanes Are Now Used To Carry Every Kind Of Shipment

Fifty tons of milk are being carried every week by aeroplane between London and the Continent, says a Tit-Bits writer.

Recently a consignment of seahorses for the Zoo arrived by aeroplane at Croydon. Great care was lavished on these fantastic creatures, half horse and half dragon, which were caught in the Bay of Biscay and throughout the flight air was pumped into their tanks at ten-minute intervals.

Delicate goldfish are often transported in this manner, but the most valuable fish cargo by air was a number of very rare, rainbow hued specimens from the East Indies, some of which were valued at \$180 per inch.

A barred cage was recently built inside the fuselage of an aeroplane which left Croydon for Le Bourget, where it picked up a fully grown lion, complete with trainer, and brought them back at over 100 miles an hour.

Another special compartment was fitted in an aeroplane to accommodate a performing circus horse from Paris to London; while an air-freighter arrived recently from Amsterdam with a bear, a monkey and a consignment of parrots.

Twenty years ago it would have been impossible to build a road to the site of the new observatory on Mont Blanc. The aeroplane has made it possible to convey the stones and materials to a height of over 15,000 feet on the mountain side, but when the road is completed it will be one of the most expensive in the world.

It seems strange that milk, easily obtainable in all great cities, should be carried by air, but mysterious zinc-lined boxes were once regularly carried from Croydon to Paris, and these contained two gallons of milk in glass bottles, packed in ice.

The American visitors to whom the boxes were addressed had been so impressed with the purity of English milk, that they cheerfully paid 80c. a pint to have it delivered to them in Paris!

Would Change Denomination

A party of clergymen were attending a Presbyterian conference in Scotland. Several of them set off to explore the district.

Presently they came to a river spanned by a temporary bridge. Not observing a notice that the bridge was unsafe, they started to cross it. The bridge-keeper ran after them in protest.

"It's all right," declared the spokesman, not understanding the reason for the old man's haste; we're Presbyterians from the Conference."

"I'm no' carin' about that," was the reply, "but if ye dinna get off the bridge ye'll be Baptists!"

The province of Saskatchewan which produces about one-half of the total wheat yield of Canada, is the third largest producer of dairy and also of eggs and poultry among the nine provinces of the Dominion.

Friend—You think then that the heathen are slow to adopt the white man's religion.

Globe Trotter—Yes. You see, they have to adopt his vices before they see the need of it.

Many would put the world right, but forget to start with themselves.

For Sprains—Use Minard's Liniment.

agree Diamond Dyes are better dyes. The white package of Diamond Dyes is the highest quality dye, prepared for general use. It will dye or fast silk, wool, cotton, linen, rayon or any mixture of materials. The blue package is a special dye for silk and wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. When you buy—remember this: The blue package dyes silk or wool only. The white package will dye every kind of goods, including silk and wool. Your dealer has both packages.

Diamond Dyes contain the highest quality anilines money can buy. And it is the life of that count. They are the life of dyes, the source of their rich colors, brilliancy and permanence.

Little Helps For This Week

"He will be very gracious unto thee at the voice of thy cry."—Isaiah xxx. 19.

Father! before Thy footstool kneeling,

Once more my heart goes up to Thee.

For aid, for strength, to Thee appealing,

Thou who alone canst succor me.

And oh! in my exceeding weakness, Make Thy strength perfect; Thou art strong!

Aid me to do Thy will with meekness,

Thou to whom all my powers be-long.

There is no good in praying for anything, unless you will also try for it. All the signs and supplications in the world will not bring wisdom to the heart that fills itself with folly, every day, or mercy to the soul that sinks itself in sin, or usefulness and honor to the life that wastes itself in vanity and inanity.

—Henry J. Van Dyke.

Opinion Wasn't Worth Much

It is told of a popular solicitor that he called upon a brother in the profession, and asked his opinion upon a certain point of law. The lawyer, to whom the question was addressed drew himself up and observed, generally get paid for what I know." The questioner drew a half-dollar from his pocket, handed it to the other and coolly remarked: "Tell me all you know and give me the change."

The Man With Asthma almost begs for death to end his suffering. He sees ahead only years of endless torment with intervals of rest which are themselves fraught with never ceasing fear of renewed attacks. Let him turn to Dr. J. D. Kellogg's Asthma Remedy and know what complete relief it offers. Let him try it faithfully and he will find his asthma a thing of the past.

The first reference to sugar obtained from cane was made by Theophrastus in the third century B.C. He mentioned it as "honey" which came from bamboo.

DOCTORS quite approve the quick comfort of Aspirin. For these perfectly harmless tablets will ease an aching head without penalty. Their increasing use year after year is proof that they do help and can't harm. Take them for any ache; to avoid the pain peculiar to women; many have found them marvelous at such times. The proven directions found in every package of Aspirin tell how to treat colds, flu, throat, neuritis, neuritis, etc. All druggists.

ASPIRIN

Aspirin is a Trademark Registered in Canada

Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and, at once, the symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid. You will never have any more heartburn, indigestion, or any other acid trouble. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

Wednesday morning the stork paid a visit to the home of Mr. and Mrs. F. M. Hill and left an eight pound boy. Both are doing nicely.

Mr. and Mrs. H. B. Pollock, of Vancouver, have been spending a month with their daughter, Mrs. H. E. Jones, and returned to Vancouver today.

Mr. and Mrs. Ralph Dunlop are receiving congratulations on the arrival of a son, Orville Fenton, on October 5th, at the Royal Alexandra Hospital, Edmonton.

The Ladies Aid of United Church are holding their Annual Bazaar in the Church on November 2nd. Fancy work, Aprons, Candy, Home Cooking and a Fish Pond for big and little. Keep this date in mind.

Saturday night Mr. J. R. Love, M. L.A., ended a series of meetings through his constituency at Albert School. In all parts of the constituency a good attendance was present and while the farmers in most cases are badly hit through drought they are still very optimistic and have prepared more land than usual for crop next year.

The Women's Institute will raffie their quilt and bedspread on October 19th at 8:30 p.m. in Kiefer's Hall.

Don't forget the Women's Institute Bazaar on November 30th. The next meeting of the W. I. will be held at the home of Mrs. Percy Jones, Nov. 7th and will start sharp at 8 o'clock.

Here and There

(385)

"The greatest apple crop in the history of Nova Scotia," is the almost unanimous opinion expressed by prominent fruit growers and Government experts of the province. It is estimated the crop will reach 2,500,000 barrels, at least half a million barrels more than any other crop ever raised in Nova Scotia.

In preparation for the opening of the 1929 big game hunting season in New Brunswick, 25,000 hunting licenses have been sent out from the Department of Lands and Mines to 300 vendors in all parts of the province.

E. W. Beatty, chairman and president of the Canadian Pacific Railway, accompanied by a group of directors of the company, is now on his annual tour of inspection of company's properties and conditions in the west. Resorts, agricultural centres, experimental farms, mines and smelting plants, as well as the system itself was inspected during the tour which started September 5 from Montreal and closes at Winnipeg October 2.

"I am watching with the greatest interest the progress being achieved in the United States where railways are experimenting in the use of aeroplanes as adjuncts to their railway services," said E. W. Beatty, chairman and president of the Canadian Pacific Railway, interviewed at Toronto recently. "There they are using planes by day in certain places and rail travel by night and the experiments are very interesting to me," the president added.

Two first prizes, three seconds, and a third award were won by the Canadian Pacific Railway Supply farms championship Holstein herd from Strathmore, Alta. at the 60th annual provincial exhibition at New Westminster recently. This is a follow-up to the Vancouver Show where the herd led all others.

Up to the end of August, says Colonel J. S. Dennis, chief commissioner of the railway's department of colonization and development, the Canadian Pacific brought to Canada 1792 boys for placement in agricultural employment under the distributive schemes of the company. "This is the largest number of British boys brought out to the Dominion by any one organization," says the Colonel.

Back from a month's wanderings along the line of the Dominion Atlantic Railway in Nova Scotia, Miss Juliette Gaultier de la Verendrye, noted-folk-song artist, stated that she had discovered 300 folk-songs that were either quite unknown hitherto or else were interesting variants in melody and tune to similar songs in vogue among the French-Canadian habitants. She will sing some of them at forthcoming concerts.

During the first five months of the year 5,389 homesteads representing 862,240 acres of land were taken out in Alberta, settlement being mainly in the Edmonton, Grande Prairie, Peace River and Prince Albert districts.

The New Triumph Marconi

Batteryless Console

The performance of this new Marconi model sets a new high standard in the field of Batteryless Radio.

Powered with nine of the latest "AC" Radiotrons, it operates direct from the house lighting current, furnishing the sensitive selectivity and tone brilliancy that will satisfy the most critical.

Built into its handsome two-tone matched walnut cabinet is a Superb Dynamic Speaker, assuring a smoothness and a fidelity of reproduction over the entire musical scale. Rattle or distortion is pleasingly absent from reception even when operated at roomfilling volume.

Judged by any standard this new Triumph Marconi Batteryless is a Receiver the owner may well be proud of.

The Renaissance of the English Folk Dance

"Merrie England" and the spacious days of Queen Elizabeth with Maypole and Morris Dance are being given new life in the Old Country within the present century and so great is the popularity of the revival that Hyde Park, the great London rendezvous of rank and society, has been gay with annual festivals of folkdancers in colourful motion. A century of industrialism has not been sufficient to kill the ancient urge and Cecil Sharp, thirty years ago, was astonished to see countrymen in an English village, fantastically apparelled, come dancing through the show one Boxing Day to the strains of a concertina. Eleven years later he founded the English Folk Dance Society which today has a membership of 15,000 with over fifty branches. Certificated teachers from this society have been doing excellent work in Canada and will be encouraged greatly by the visit to this country of sixteen of the best English dancers from the parent society under the leadership of Douglas Kennedy for a series of demonstrations at the forthcoming English Music Festival at the Royal York Hotel, Toronto, November 13-18 next. Lay-out shows groups of folkdancers; an English Folk-dance; and Douglas Kennedy, leader of the English Folkdance Society accompanied by Joan Sharp, daughter of the founder, with pipe and tabor.

4. The "Lady Nelson" in West Indian Waters.

Passengers on board the Lady Nelson and the other units of that fine fleet of new steamers just put into the West Indies service by the Canadian National Railways, as they steam down the highways of the Atlantic Ocean and linger on the shimmering moonlit waters among the Treasure Islands to the South, will now be regaled by entertainment brought to them by Radio from distant or nearby stations. Failing this they need not be without music at their meals or for dancing, since these new floating palaces have been equipped with the latest developments of Radio Science, the Public Address and Music Reproducing System.

This is a system of Amplifiers with controls in the Wireless Cabin and extra high quality loud speakers, capable of accurately reproducing the most delicate shades of musical tone or voice inflection.

This equipment installed by the Northern Electric Company for the five vessels of this new fleet, consists of powerful amplifiers to which are connected for instant use, a sensitive microphone for "picking up" a concert from the Lounge, a Radio Broadcast Receiving Set and a Music Reproducing rendering available recorded music; any one of these systems may be "cut in" at a moment's notice.

A specially designed loud speaker is placed in the Lounge Salon, and high quality cone speakers are located in the dining and smoking salon. Two large horns such as shown in the accompanying picture are "built in" on the After Boat Deck where dancing may be indulged in. The Wireless officer who is not on watch, has charge of the apparatus and operates it for the benefit of the passengers at scheduled times throughout the day and late into the night. The volume is controllable from a mere whisper to the fanfare of a whole orchestra.
